

CHANGING THE RESOLUTION OF YOUR SCREEN

1. Minimise all program windows.
2. On a clear area on your desktop, click the right mouse button once. A window will appear with several selection options.
3. Scroll down with your mouse and select 'Properties' by clicking with your left mouse button once highlighted. The 'Display Properties' window will appear. Run through the tabs across the top to select 'Settings' as below.

4. By holding down the left mouse key over the selection arrow, you will be able to adjust the screen resolution. It will jump in increments. The www.verbeek-petrides.com website has been designed for viewing at a resolution of 1024x 768.
5. Left click with your mouse on ' Apply' after you have selected 1024x768. Your screen will go black for about 5 seconds before refocusing at a resolution of 1024x768.

PLEASE NOTE: If you have been using a setting of 800x600 the program windows and short cuts on your desktop will now be smaller.
